# deventrade

on the road to

# Circular

**Olaf Pothoven, director of Deventrade: “How can we make the textile industry cleaner? As a company, this question occupies us daily. We will only get the textile industry ‘clean’ if we produce more demand-driven and more locally. Another necessity is to use recycled and sustainably produced raw materials!**

 **Recycled**

Me With You+

# sportswear

**Based on these ideas, Deventrade is constantly taking new steps to become more sustainable. The ultimate goal: fully circular production of sporting goods.**

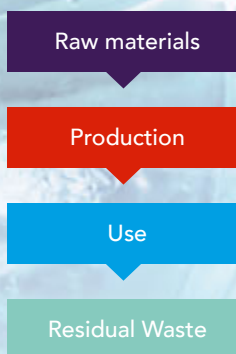

## The change that is needed

Raw materials are finite. Continuing with the current way of producing where raw materials (and garments) are thrown away after being used a few times is no longer sustainable. After a few uses, raw materials (and attire) are thrown away, which is a thing of the past. We must take the consumer with us to transition to a more sustainable economy.

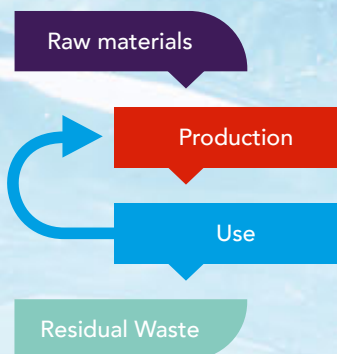

## How do we realise the shift to fully circular sports brands?

Deventrade has set itself various goals to become more sustainable through the entire production chain. We feel responsible for our people and the environment and do everything we can to reduce our CO<sub>2</sub> footprint. Therefore, we are proud to announce that we contribute to this goal with the following four steps. With the following four steps we are contributing to this sustainability. (read more on the following pages).

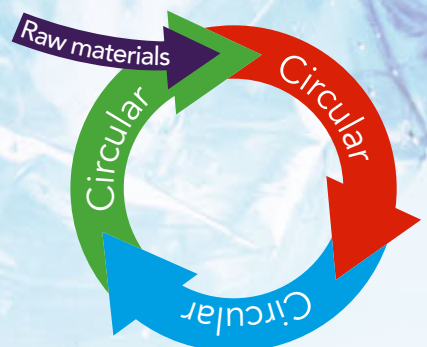

### Linear

### Recycling

### Circular

# 1

## MWY+

We are making it increasingly easy for our customers make sustainable choices. Under the MWY+ label, we market clothing made from sustainable materials. This saves on the use of natural raw materials. Other sustainable concepts also fall under this label, such as creating a more sustainable office space and sustainable partnerships, including the collaboration with the salvation army reshare and sustainable packaging materials. We make it easy for customers who want to shop more consciously to recognize these products. A special hangtag identifies the products with more information about MWY+. On the catalogue's product pages, these products can be recognized by the MWY+ logo.

Me With You+  
for a better world

By consciously choosing this MWY+ article, you make a sustainable future possible for everyone.

MWY+ is..

- Saving natural resources
- Made of sustainable materials
- Our first steps towards a sustainable world

# 2

## The Reece recycled collection is developed from nature collected and recycled PET bottles

Stylish and sustainable: that's the Reece recycled collection. In the catalogue, you'll find the **Recycled collection**, high quality, cool sportswear with one difference: these sports items are made from nature collected and recycled PET bottles. Each item has a card with the number of bottles that have been collected from nature and recycled to make this collection. Therefore, the Recycled collection literally means less plastic in nature or in the ocean and a more planet-friendly production process.

Besides the Recycled collection, more sustainable items are found in the catalogue, such as the **Uni Pro socks** (page 52), which are made from recycled polyester. Playing sports in recycled clothing has never been easier.

## Recycled collection: push the boundaries with Reece

Last year we introduced the Recycled collection. The Recycled collection is made of fully recycled PET bottles. The Recycled collection results from a unique collaboration between Reece and Waste-2Wear.

The collection consists of a shirt (Rise) and polo (Sheila and Elliot) and is available in different colours for men, women and kids. You can find the Recycled collection on pages 12 until 19.

### 3 Cooperation with Salvation Army ReShare

We go further than just producing a collection made from recycled materials because it is also essential to take care of worn clothing. Therefore, together with our partner Salvation Army ReShare, we offer sports clubs special recycling and return service.

At hockey clubs SV Kampong and HC Zwolle, the first containers have been placed, members can put used clothes in these containers, which will then be offered to the Salvation Army or be recycled into new articles. In the future, we will collect the recycled products delivered by us after use to be recycled again into new products or reused.

RESHARE

### 4 Code of Conduct

As a leading textile company with various production sites worldwide, take our responsibility for corporate social responsibility seriously.

It is important that everyone involved can work responsibly, and we keep an eye on the impact on the environment. By drafting our own Code of Conduct and sharing it with our suppliers, we set clear rules for the well-being of the workers in the factories. This Code of Conduct goes hand in hand with the Code of Conduct of amfori BSCI, which Deventrade is affiliated with.

The membership obliges us to do everything in our power to do business in a socially responsible way. Amfori BSCI stands for 'Trade with Purpose', a world in which all trade brings social, economic and environmental benefits to all involved.

#### About amfori BSCI

The Business Social Compliance Initiative (BSCI) is an initiative of companies committed to improving working conditions in their global supply chain. BSCI offers a standard code of conduct and a roadmap for companies to follow that applies to all sectors and manufacturing countries.

INFO

#### About recycled polyester

Recycled polyester comes from polyester PET bottles, rejected B-grade fabrics and residual materials.

Using existing materials reduces the demand for raw materials by 65%.

Recycled polyester is just as good as ordinary polyester. It is strong, retains its strength and shape, resists abrasion and wrinkles and dries quickly. In other words, it is an excellent material for the manufacture of sportswear.

We hope that you are as just as enthusiastic about these steps as we are!

On to a sustainable, circular future.

# Exclusive team kit?

**CHOOSE**

# Special Design

Does your club have a milestone or celebration coming up that calls for a **special outfit**? Do the club's articles of association place specific requirements on sports clothing? Or is your team just eager to turn out in a kit worn by no one else?

Then **Special Design** is the **solution** for you. Our Special Design items have the **qualities** you can expect of a leading teamwear brand: **superb functionality** for the best possible performance and a **perfect fit**.

## Special Design socks

Also socks can be produced in the clubs colours, with a knitted club logo. This adds to and enhances the unique appearance of Special Design. Special Design socks can consist of a maximum of four colours. The design is free, if technically feasible. You can choose from many standard colours, but also come up with your own colour variants. As soon as the design is final, the supplier sends you a sample. Production starts as soon as an agreement is reached.

The total number of ordered socks must be at least 150, with at least 15 socks per size. For more information about delivery and delivery times of Special Design club socks please send an email to: [sd@deventrade.com](mailto:sd@deventrade.com)

OPTIONS	LIMITED	UNLIMITED

Our collection of sticks is composed in such a way that young and old, professional and amateur can always choose a stick that exactly matches the personal wishes. Every stick from Reece has its own material mix that results in a specific stiffness and the associated properties. In addition, the curvature, the balance point and the length of the stick are important. Differences are in line with various playing styles and therefore with personal preferences.

## MATERIAL

Most of our junior sticks consist of a combination of wood and fiberglass. While most senior sticks are made of synthetic material, combinations of carbon and fiberglass. The ratio between these materials is decisive for the stiffness, the weight and feel of the stick. The exact composition can be found on each stick and in the product information text.

- » carbon: for extra stiffness and strength
- » kevlar: for vibration absorbing and impact reduction
- » fiberglass: for durability and strength
- » wood: for an optimal ball feeling

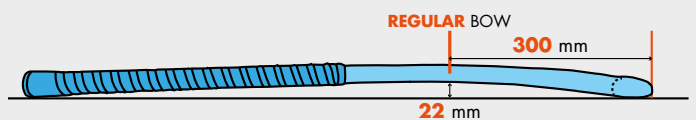

The percentage of carbon in a stick is an important indicator of the stiffness. The stiffer the hockey stick, the lower the energy loss in the bend of the stick. For this reason, players often choose sticks with a high carbon content when they're playing with strength and power. A less stiff stick enhances ball control. Ball control is important for the development of technique.

## BOW / CURVATURE

Also, the curvature of a hockey stick is a very key feature. The curvature of the stick is referred to in millimetres and varies between 22 mm and 24,7 mm. The greater the curvature, the more technical the game of the player often is. Playing with a strong curvature therefore requires some practice. The bow indicates at what point the curvature begins in the stick. This can vary from a regular bow, pro bow, pro bow+ to pro bow++.

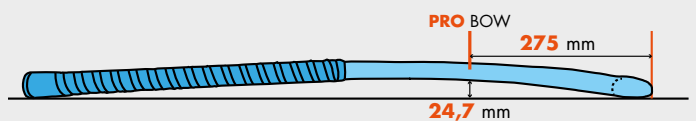

### REGULAR BOW

- » curvature of 22 mm
- » bow in the middle of the stick
- » classic curve for all-round use

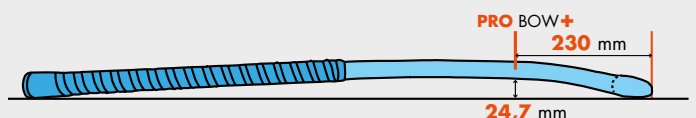

### PRO BOW

- » curvature of 24,7 mm
- » bow in the middle of the stick
- » optimal balance between control and easily hitting the ball
- » strong curvature for technical players

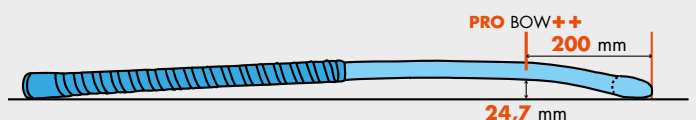

### PRO BOW+

- » curvature of 24,7 mm
- » bow at the bottom of the stick
- » pro bow+ makes it easier to push
- » strong curvature for technical players

### PRO BOW++

- » curvature of 24,7 mm
- » bow at the bottom of the stick
- » pro bow++ makes it easier to push
- » strong curvature for the most technical players

## LENGTH

Hockey sticks are available from size 24" up to size 37,5". Especially for children it is important to purchase the right size stick. Too short a stick decreases the impact force and has a negative influence on the body posture. A stick that is too long will cause difficulties with ball control and develops the wrong technique. The table gives a good indication of the right stick length at each height. But make sure you always get good advice with this!

## QUALITY ADDITIONS

Besides the excellent properties of our sticks, some of our hockey sticks are equipped with various high quality additives.

### CARBON TECHNOLOGY

Sticks with this technology contain carbon fibre for even more power and feel. Hyper carbon provides high impact reduction and captures hard balls easily.

### IDS

The IDS abbreviation stands for Integrated Damping System. The cap of the grip of the stick reduces vibration. This reduces the chance of arm injuries and allows for a smooth passage of the ball.

### ULTRA LIGHT WEIGHT

With ultra light weight sticks, dribbling uses less force. In combination with a high carbon content, this delivers a light weight stick that allows the player to hit the ball hard.

### XL-GRIP

Because many players have indicated that they find a longer grip more pleasant when playing, many of our sticks have an extra long grip.

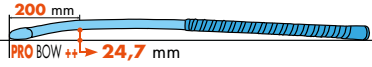

## Pro Supreme 900 Grambusch Ltd Hockey Stick

90% carbon, 10% kevlar

SIZES: 36,5" - 37,5"

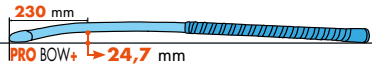

- » lightweight senior hockey stick for superior performance
- » strong curvature for the most technical players
- » 90% carbon for maximum strength and ultimate ball feeling
- » extra high impact reduction
- » pro bow++ (200 mm) for optimal ball control and accuracy
- » strong curve (24.7 mm) ideal for strength and control
- » extra speed with your (drag) push

## Pro Supreme 900 Herzbruch Ltd Hockey Stick

90% carbon, 10% kevlar

SIZES: 36,5" - 37,5"

- » lightweight senior hockey stick for superior performance
- » ideal for technical players
- » 90% carbon for maximum strength and ultimate ball feeling
- » extra high impact reduction
- » pro bow+ (230 mm) for optimal ball control and accuracy
- » strong curve (24.7 mm) ideal for strength and control
- » extra speed with your (drag) push

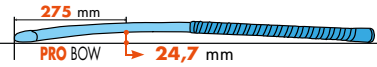

## Pro Supreme 900 Hockey Stick

90% carbon, 10% kevlar

SIZES: 36,5" - 37,5"

- » lightweight senior hockey stick for superior performance
- » ideal for technical players
- » 90% carbon for maximum strength and ultimate ball feeling
- » extra high impact reduction
- » pro bow (275 mm) for optimal ball control and accuracy
- » strong curve (24.7 mm) ideal for strength and control
- » extra speed with your (drag) push

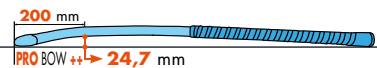

black - multi  
889258 - 8765

## Pro Supreme 800 Hockey Stick

80% carbon, 10% kevlar, 10% fiberglass

SIZES: 36,5" - 37,5"

- » ultra lightweight senior hockey stick for superior performance
- » strong curvature for the most technical players
- » 80% carbon for maximum strength and ultimate ball feeling
- » high impact reduction
- » pro bow++ (200 mm) for optimum balance between control and easy pushing
- » strong curve (24.7 mm) ideal for strength and control
- » extra speed with your (drag) push
- » added titanium for extra stiffness

black - multi

SPORTS EQUIPMENT

# PADEL RACKET

## COLLECTION INFORMATION

Padel is rapidly gaining ground. Not surprising because this racket sport is described as interactive, fun and challenging. For those who want to start with padel, a short explanation: padel is a mix of tennis and squash. The count is the same as for tennis. Padel is played with four people on a padel court that is surrounded by glass walls. These walls are part of the game, so the ball is not out as quickly as with tennis, so that it is easier to play long rallies. Power is, therefore, less important with padel. This allows everyone to participate in this sport.

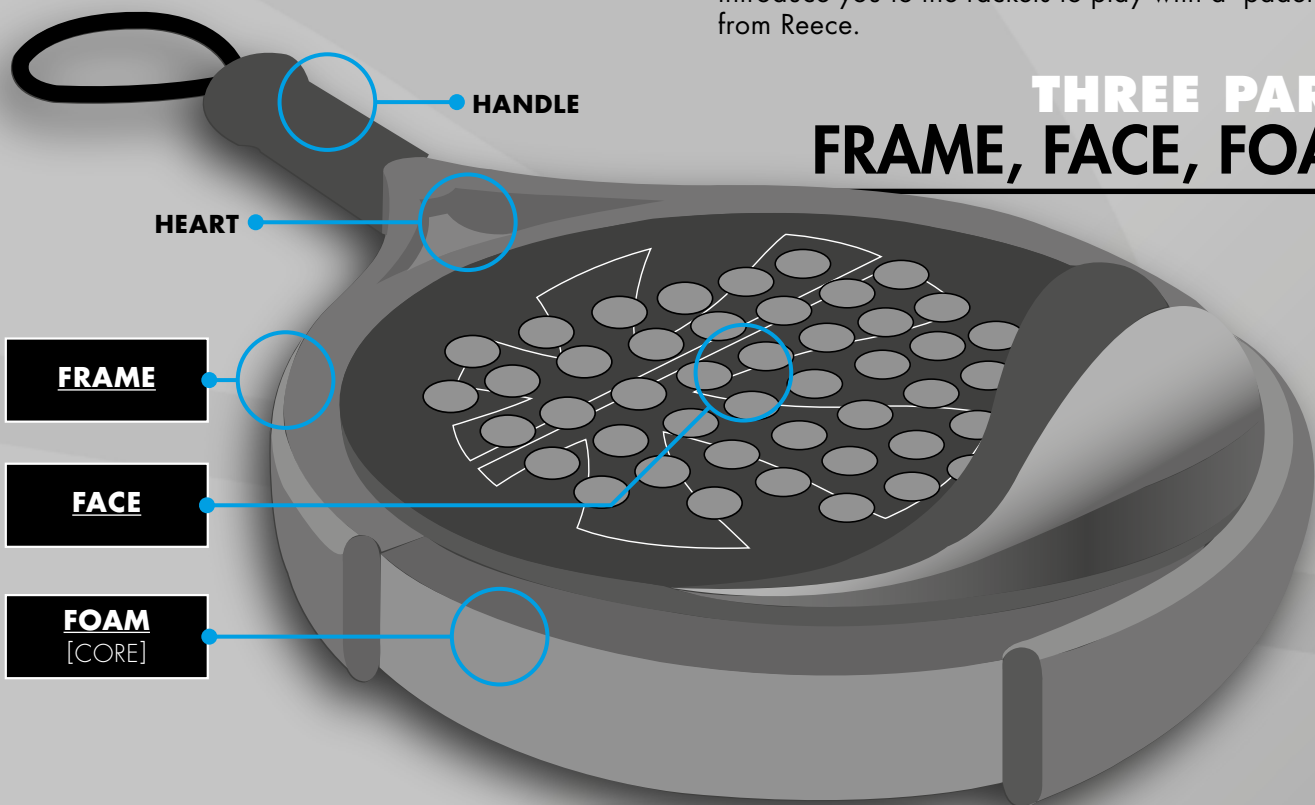

### WHAT DO YOU NEED TO PLAY PADEL?

The most important thing you need to play padel is a padel racket! That is why we have a wide range of padel rackets available for beginners, intermediates and advanced players.

### WHAT IS THE BEST PADEL RACKET FOR YOU?

Factors that are important when choosing a racket are the material, the shape of the racket, the location of the sweet spot, and the weight. We will provide you with all the information you need to make a good choice. Let us introduce you to the rackets to play with a padel racket from Reece.

## THREE PARTS FRAME, FACE, FOAM

Basically, a padel racket is made of three parts (frame, face, foam). From the outside, it might seem like a single piece but there are in fact three parts with different compositions fused together into a single shape:

### FRAME

It is an outside part of the racket, it starts from handle and revolve around the face area, it gives the racket its firmness and strength. You can choose frame according to your requirement e.g. Fiberglass, 3k carbon, Mix (50% carbon and 50% Fiberglass).

### FACE

Face is the most important part of the racket, as it is the area where the ball hits and depending on their composition it gives different feelings and performance when playing. You can choose different fabrics to make rackets more durable and beautiful.

### FOAM (CORE)

The impact surface is normally made of EVA foam, covered with different materials, depending on the requirements of the costumer.

All padel rackets have a solid impact surface that is filled with holes to allow an easy swing in the air. This surface may be hard or soft and determine the performance of the racket.

EVA  
SOFT

#### EVA SOFT:

Low-density EVA foam provides a large amount of ball return and comfort during play.

EVA  
MEDIUM

#### EVA MEDIUM:

Enhanced EVA foam that provides great ball return without losing power.

EVA  
PRO

#### EVA PRO:

High-density EVA foam that increases the power and high-speed hits, with perfect control.

## Ranken Backpack

600D polyester

SIZE: 25 X 40 X 16 CM (WXHxD)

- › multifunctional backpack
- › stick-it-through compartment
- › adjustable backpack straps
- › spacious main compartment (divided into two compartments)
- › a smaller area at the front and a mesh area at the side
- › reflective prints

## Coffs Backpack

100% polyester ripstop

SIZE: 34 X 50 X 18 CM (WXHxD)

- › multi-functional backpack
- › adjustable backpack straps
- › spacious main compartment, smaller pocket at the front and mesh pocket at the side
- › reflective prints on all sides
- › lightweight
- › laptop compartment (foamed)
- › dirt-resistant bottom
- › a tiny safety whistle in buckle for emergencies

## Heroes JR Backpack

300D polyester, polyester ribstop, PU

SIZE: 27 X 45 X 15,5 CM (WXHXD)

- » multifunctional backpack
- » adjustable shoulder straps
- » several large and small compartments
- » storage possibility for valuables
- » bottle holder
- » shoe compartment
- » laptop compartment (foamed)
- » stick holders with velcro fastener for attaching hockey sticks
- » raincover
- » dirt-resistant bottom
- » lightweight
- » reflective prints

## Junior Stick Bag

600D polyester

SIZE: 22 X 100 X 12 CM (WXHXD)

- » stick bag for junior hockey sticks
- » adjustable shoulder straps
- » multi pockets with zips
- » silicone handle
- » suitable for a maximum of four hockey sticks
- » mix & match limited package

## Giant Stick Bag

600D polyester

SIZE: 25 X 100 X 30 CM (WXHXD)

- » spacious stick bag
- » provided with backpack straps, an adjustable shoulder strap and a silicone handle
- » many pockets with zips
- » suitable for a maximum of six hockey sticks
- » mesh pocket at one side
- » reflective prints
- » enough space for printed (sponsor) logos
- » dirt-resistant bottom

## Derby II Backpack

polyester

SIZE: 34 X 44 X 20 CM (WXHXD)

- » multifunctional sports bag
- » stick-it-through compartment
- » extra inner compartment
- » front pocket with zip
- » adjustable shoulder straps
- » reflective prints
- » mesh pocket at one side
- » dirt-resistant bottom

black  
885824 - 8000

## Derby II Stick Bag Small

polyester

SIZE: 19 X 98 X 14 CM (WXHxD)

- » hockey bag with room for four sticks
- » several pockets with zips
- » two mesh pockets on the sides
- » adjustable shoulder straps
- » silicone handle
- » reflective prints
- » dirt-resistant bottom

## Derby II Stick Bag

polyester

SIZE: 24 X 100 X 24 CM (WXHxD)

- » hockey bag with room for six sticks
- » several pockets with zips
- » two mesh pockets on the sides
- » adjustable shoulder straps
- » silicone handle
- » reflective prints
- » dirt-resistant bottom

## Trolley Bag Medium

# MATERIALS

**AQUA  
TEC**  
BREATHABLE  
MATERIAL

High quality, very comfortable. Light weight. Water- and windproof, pu-coated, with taped seams, and breathable. The advanced microfiber yarns give optimal transportation of body fluid and keep you comfortable in various conditions.

**CLIMA  
TEC**  
HIGH TECHNICAL  
FIBRE

Comfortable, warm, light-weight, fast drying and easy to maintain. The advanced microfibrils give optimal body fluid transport and keeps you comfortable in many different conditions.

**COMFORT  
TEC**  
HIGH COMFORT

High technical quality. By combining different yarns the garments are very comfortable and suitable for sport and leisure use. Suitable for training and intensive use, colour and shape retaining. Suitable for printing.

**DURA  
TTS**  
100%  
POLYESTER

TTS is a highly functional and durable material. Extremely suitable for strenuous exercise. The material is easy to wash which simplifies maintenance.

**POLY-  
AMIDE**  
LIGHTWEIGHT  
ELASTIC FIBRE

Polyamide is characterized by excellent elastic properties and high strength. The material guarantees optimal wearing comfort, is lightweight and remains beautiful after many washes. The insulating properties also retain body heat.

**POLY-  
ESTER**  
HIGHLY ELASTICATED  
FIBRE

Extra elastic polyester gives our socks an even better fit. It also provides extra stretchability, making it easier to place the shin guard underneath.

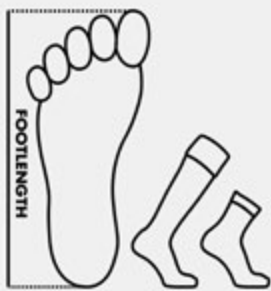

**POLY-  
PROPYLENE**  
LIGHT THERMAL  
FIBRE

Polypropylene is a thermal fibre with the lowest specific weight available. It is moisture-resistant and moisture-transportable. Polypropylene is 100% real colour, non-shrinking and recyclable. It gives perfect comfort to your feet and avoids skin irritation. Stanno specifically uses polypropylene for high quality sports socks.

**WOVEN  
TEC**  
MICRO  
FIBRE

The use of microfiber increases the comfort of the fit and gives the material a soft feeling. Microfiber materials have a high quality look and feel.

## SOCKS

Length (cm)	EU	US	UK
≥ 15,9	25 - 29	9 - 12	8 - 11
≥ 18,4	30 - 35	12,5 - 4	11,5 - 3
≥ 22,9	36 - 40	4 - 7,5	3,5 - 6,5
≥ 26	41 - 44	8 - 10,5	7 - 9,5
≥ 29	45 - 48	11 - 13,5	10 - 12,5

## PRIME SOCKS

Length (cm)	Calf size (compression)	EU	US	UK
≥ 22 - 24,5	32 - 37	35 - 38	3 - 6	3 - 5
≥ 25 - 27,5	38 - 42	39 - 42	7 - 9	6 - 8
≥ 28 - 30,5	43 - 47	43 - 46	10 - 13	9 - 12

### SHINPADS with ankle sock

Height (cm)	Shinpads size	
110-130	XS	MINI
130-150	S	PUPIL
150-170	M	JUNIOR
170-190	L	SENIOR

This size chart is only an indication. Shinpads must be fitted to confirm the best fit.

### SHINPADS without ankle sock

Height (cm)	Shinpads size	
< 100	XXXS	
100-120	XXS	
120-140	XS	
140-160	S	
160-180	M	
> 180	L	

This size chart is only an indication. Shinpads must be fitted to confirm the best fit.

### HOCKEYSTICKS

Height (cm)	Hockeystick size (inch)
105	24
110	26
112,5	27
115	28
117,5	29
120	30
122,5	31
125	32
132,5	33
140	34
150	35
160	36,5
160	37,5
